

| | |
|----------------------------------|--|
| wire brush | Used to remove build up from battery terminals |
| scraper | Used to remove paper gasket material |
| file | Used to clean, reshape and sharpen metal surfaces |
| brakes wash machine | Used only to clean brake components |
| engine degreaser | Used to loosen dirt and oil residue from engines , is a solvent based cleaner |
| sandpaper | Used to achieve a clean flat mating surface |
| ultrasonic cleaner | Used to clean delicate components with air bubbles |
| parts wash machine | Uses a drum of cleaning detergent solution to clean components |
| carburettor parts cleaner | Uses a solvent based cleaner to clean EGR valves and throttle bodies |
| wheel cleaner | Uses a water and citric acid base to clean alloys without damaging rubber |
| cabinet | Uses an all in one cleaning unit that includes a basket, agitator, cleaning solution, high pressured water |
| bead blaster | Uses air pressure to direct glass beads or sand onto components to clean them |
| steam cleaner | Use high pressure hot water to clean the components |

| | |
|---------------------------|---|
| agitator cleaner | Uses a moving base to move parts around the cleaning solution |
| gasket stripper | Uses a solvent based cleaner to loosen gasket materials |
| electrical cleaner | Uses a solvent based cleaner to remove grease, oil, and dirt from electronics |
| basket cleaner | Uses a mesh sided container to hold parts so they can be washed using a cleaning solution |

Print, laminate and cut up for a matching the cleaning machine/solution/materials with the description of what they are used for
