

<b>Class A</b>	<b>Fires from wood, paper, plastic, cloth, cardboard etc</b>
<b>Class B</b>	<b>Fires from flammable liquids such as petrol, oil, paint, thinners, solvents etc</b>
<b>Class C</b>	<b>Fires from flammable gases such as acetylene, LPG and CNG</b>
<b>Class E</b>	<b>Electrical fires from motors, generators, switches etc</b>
<b>Water</b>	<b>Located near rubbish bins, used for wood, paper, rubber etc, not electrical or flammable liquids</b>
<b>Foam</b>	<b>Used on oil, grease, paint etc, located near dangerous goods store. Not for electrical fires</b>
<b>Co2</b>	<b>Used for electrical fires, should be located near switch boards and generators, because it doesn't cause any further damage to electrical systems</b>
<b>Dry Powder</b>	<b>Multipurpose for A, B, C and E fires. But can cause further damage to electrical systems</b>

Print, laminate and cut up to match the class of fire and materials or type of extinguisher and fire to use it on
