

Maximus[®]

Very highly productive HSR Seeds 102 CRM soft feed/silage maize. *Maximus*[®] is a hybrid that produces a large bulky plant and has a root system to match, and has extremely high water use efficiency. A maize plant that is designed principally for the grower who wants a large robust plant with an excellent grain yield or top yielding/quality maize silage.

Grown in the warmer regions of New Zealand. Produced great results in independent FAR Maize Trials across New Zealand.

Growers seeking a reliable, high yielding, excellent standability in a maize hybrid, should be growing *Maximus*[®]. Producing high quality 'starchy' feed grain/silage end product. Farmers that want a stable hybrid that is still performing exceptionally well across environments should look at *Maximus*[®]. The benchmark in the marketplace.

PLANTING POPULATIONS

75,000 TO 95,000 seeds/ha
(GRAIN 75-90K)

Plant Type:

102 CRM Quick Silage or Grain

Yield Potential:

Great yields with high nutritional values and digestibility

Plant Height:

Tall plant with large root structure for high WUE.

Grain Type:

Dent x Dent highly digestible feed grain. High Starch content in grain and silage.

General Comments:

Consistent and high yields under solid inputs.
