

| 320 STANDARD MILKING CLUSTER

An entry level model milking cluster designed to optimise the milk harvesting process.

OPTIMISE YOUR MILK HARVESTING PROCESS WITH AN INDUSTRY PROVEN CLUSTER

The 320 Standard Cluster is an entry-level cluster that has been well proven in the market place for many years.

The Waikato Milking Systems' Standard Milking Cluster provides even milk extraction from each quarter for faster, more efficient milking.

Featuring large bore inlets and outlets to improve milk flow and evacuation, while ensuring a stable milking environment. The robust design of the Standard Milking Cluster optimises the milk harvesting process with a lower entry price.

ADVANTAGES

The Standard Milking Cluster provides unsurpassed milk extraction.

Optimise your milk harvesting

Achieving even extraction from each quarter, faster, this ensures a more efficient milking.

High performance cluster

With stainless steel tops, suitable for large bore liners, the 320 Standard Milking Cluster, gives you the performance you need.

Five year Claw warranty

The 320 Standard Milking Cluster offers a 5 year warranty on the Claw bowl, giving you peace of mind.
