

| AIR INJECTOR

Complete wash cycle customisation to ensure persistent washing, every time.

CONSISTENT WASHING OF YOUR MILKING MACHINE

Waikato Milking Systems Electronic Air Injector gives a wash system the power it needs to thoroughly clean any milking system.

Both the air blast time and the cycle timing can be adjusted independent of each other and it is versatile enough to work with any milking machine where a slug wash system is used. Ensures a precise wash system set-up and a repeatable wash process every time.

SPECIFICATIONS

- Latest electronically controlled SMART software
- Push-over mounting to fit onto 32mm stainless steel tube
- 10 Individual settings
- Adjustable electronic timing
- Easy clean sponge filter
- 12 and 24 volt power options
