

| MILK PUMP

Centrifugal milk pump moves the milk to the bulk tank at high volumes

HIGH PERFORMANCE MILK PUMP

Designed with precision, the Fristam centrifugal milk pump is the top of the line solution for pumping milk around the dairy.

The robust build ensures a long service life and is ideal for use in larger rotary dairies. All Fristam pumps are equipped with open impellers, ideally suited for use in hygiene applications, and specially selected stainless steel alloys provide the basis for trouble free operation.
