

| WAIKATO SHELLS

High grade stainless steel shells

LIFETIME DURABILITY FOR CONSISTANT PERFORMANCE

Waikato Stainless Steel Shells are strong, and durable.

Waikato Shells are made from high-grade stainless steel to provide a lifetime of reliable performance. The stainless steel construction ensures exceptional durability and product life. The nipples are designed to position the short air tube accurately and in line with the pulse block on the claw. Use these shells with Waikato Milking Systems liners to ensure a perfect fit and optimum performance. Waikato Shells come in standard and lightweight options. They are the same dimensions but thinner steel is used for the lightweight option.

SPECIFICATIONS

- High grade stainless steel
- Excellent integration with Waikato liners and claws
- Exceptionally durable
- Strict quality control ensures exceptional and consistent performance
